DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakurai et al. in view of Paoluccio.

The patent by Sakurai et al. (4,790,287) shows an oil separator for an internal combustion engine with a basket (57) sealingly mounted to a crank case (53) of an engine. The basket contains at least one vent for allowing blow by gas and oil particles to pass there-through. A breather lid (55) is sealingly mounted to the basket. A filter media (62) is disposed between the basket and the breather lid for separating oil particles from the blow-by gas.

The basket forms a seal with the crank case cover and with the breather lid. The breather lid includes an outlet port (68) for allowing the blow-by gas to exit the oil separator.

The patent by Sakurai et al. does not show that the basket is located on the valve cover. The patent by Paoluccio (4,616,620) shows an oil cleaner (28) that is attached to the valve cover because of it's proximity to the combustion chamber. In view of Paoluccio (Col. 3, lines 56-58), it would have been obvious to anyone skilled in the art who wanted to reduce moisture in the oil, to improve on Sakurai et al. by placing the basket adjacent to the valve cover.

Response to Arguments

Applicant's arguments filed 9/29/05 have been fully considered but they are not persuasive. Applicant argues that the patent by Sakurai et al. does not teach a basket sealingly mounted to a valve cover of an engine. As was stated in the previous office action, the examiner acknowledges that the location of the basket is not located in the valve cover. The examiner stated that the oil separator is located in the crankcase, and that though in a different location, it works in a similar fashion. The patent by Paoluccio was used to teach that it is known in the art to locate oil cleaners in the valve cover of an internal combustion engine. The rejection modified oil cleaner of Sakurai et al. by changing the location of the basket as taught by Paoluccio. At no point in the previous rejection was it intended to imply that the art by Sakurai et al. showed the location of the oil cleaner, or that the art by Paoluccio showed the structure of the oil cleaner.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
